

Migration Assistant

Email Settings

1. **Enabled** – will turn the feature on/off,
 2. The **Email Sender** is in the originator of the email. – This can be fictional or exact.
 3. **Email Recipients** are the individual email addresses that will receive the email. Attached is an example of the email sent.
 - a. Emails are added by typing the email in the textbox below and click + to add them.
 - b. Emails are removed by highlighting the email and clicking -
 - c. The WFM SMTP Server has been defaulted but can be changed.
- The email that is sent has...
 1. The scan or load log is attached, whichever is appropriate,
 2. If you were exporting information then a log of the TM encrypted files is included,
 3. All the information that reports to the screen is embedded in the body of the email.
