# Migration Assistant

**Scripts**

1. **Old Computer Scripts –** Any scripts listed in this box will run prior to the export process,
2. **New Computer Scripts –** Any scripts listed in this box will run prior to the import process,
   > *Both of these folders are located at E:\USMT\Scripts... and anything in these folders will execute during the appropriate stage.*

- This tab is of particular use by regions that have prior setups that require addressing pre-migration,
- This is an optional piece of the migration process, and it's ideal to close all open applications before running the Migration Assistant,

https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-best-practices

**After running the import, you must log off for some settings, such as fonts and general registry settings to take effect.**
